

## Lime Heating job vacancy

**Role:** Gas heating engineer  
**Contract:** Permanent, 45hrs per week  
**Salary:** £38,000–£42,000

### Company description

Serving Milton Keynes and the surrounding areas, Lime Heating is an established team of fully-accredited, Gas Safe registered heating engineers and plumbing professionals. We are committed to providing unrivalled services with clear and reliable communication and comprehensive knowledge of safety standards and regulations. Our dedication to customer satisfaction and drive for excellence make us confident in becoming the go-to choice for all heating and plumbing needs. Our services include gas boiler servicing, gas safety checks, boiler installation, boiler repair, kitchen and bathroom plumbing, gas pipework, warm air heating, and boiler cover plans.

### Role description

This is a full-time on-site role for a qualified gas engineer located in Milton Keynes. Our service area extends to Buckingham, Bedford, Northampton and Leighton Buzzard and surrounding areas. You will be responsible for installing, repairing, and maintaining gas boilers and central heating systems. Day-to-day tasks include performing CP12 gas safety checks, conducting boiler services, working with gas pipework, and more. The role requires interacting with customers to clearly communicate the scope of works, following safety standards and regulations, and thoroughly documenting all services performed.

### Key responsibilities

- Install, maintain, and repair domestic heating systems, including but not limited to boilers, radiators, thermostats, and other related components
- Accurately diagnose issues within heating systems and determine the most effective repair strategies
- Execute necessary repairs, replacements, or installations of heating system parts, ensuring all work complies with safety and quality guidelines
- Work closely with clients to comprehend their heating needs, offer expert advice, and suggest relevant heating solutions
- Maintain detailed records of all work, encompassing: repairs, installations, and maintenance operations

...cont.

- Keep abreast of the latest developments, regulations, and best practices in the domestic heating sector
- Adhere to health and safety rules and foster a safe work environment

## Skills and requirements

- NVQ Level 2/3 in Heating and Ventilation (Domestic Installation), evidencing both theoretical and practical proficiency.
- ACS qualified
- Current Gas Safe registration
- Level 3 Diploma in Gas Utilisation Installation and Maintenance (preferred)
- Extensive knowledge of diverse heating systems, including boilers, radiators, thermostats, and controls.
- Strong fault-finding skills across boilers, heating, and plumbing systems
- Experienced in servicing, repairs, and installations
- Capable of working autonomously and as part of a team, efficiently managing workload and time
- Strong knowledge and implementation of safety standards and regulations
- Excellent problem-solving and analytical skills
- Highest level of communication and positive approach to customer services
- Full UK driving licence with a clean record
